2016 Nicolas Appert Awardee Announced

E. Allen Foegeding, PhD, North Carolina State University

Dr. E. Allen Foegeding is a William Neal Reynolds Distinguished Professor of Food Science and editor in chief of IFT scientific journals. Through exemplary teaching and research programs, his career has focused on advancing the understanding of chemical and physical properties of foods.

Foegeding's teaching program has received awards from both students and IFT and has spanned more than 30 years of courses in food chemistry, muscle foods, and colloidal and polymer properties of foods. His research on how proteins and polysaccharides function in foods has produced a foundation of knowledge on how structure determines food quality.

We invite you to attend the Awards Celebration on Saturday, July 16, at McCormick Place.

The Nicolas Appert Award has been awarded every year since 1942 by the Chicago Section of the Institute of Food Technologists. Given for lifetime and consistent achievement in food technology, it is named after Nicolas Appert, the French inventor of airtight food preservation.

Award winners receive a bronze medal with a front view of Appert from the Chicago Section of IFT and a USD 5000 honorarium from IFT. This is considered one of the highest honors in food technology.
