### University of Illinois Focuses Efforts on Pilot Plant Upgrades

The Department of Food Science and Human Nutrition (FSHN) at the University of Illinois at Urbana-Champaign continues its efforts to upgrade and optimize the equipment in its pilot plant.

In addition to physical upgrades to the work flow patterns inside the facility, the University hopes to upgrade much of the equipment. As part of this effort, FSHN is looking for high quality, used equipment. Needs range from fully integrated systems to stand-alone unit operations or even support and peripheral equipment.

Gifted equipment fully qualifies as a charitable donation. Please consider reviewing equipment inventory that you may have identified as surplus or scrap. In addition to the tax benefit, you would be helping to train the workforce of tomorrow – maybe one of your next hires!

For additional information and a copy of the needed replacement equipment list, please contact Dr. Mark Lippi at 217-300-2151, [mlippi@illinois.edu](mailto:mlippi@illinois.edu).
