## October 2012 Meeting Recap

---

### **Science-Driven Solutions with Tocotrienols (Natural $e^3$ ):**

**Dr. Fong Chee Wai, Head of R&D at Davos Life Science Pte Ltd.**

It was truly an honor to have Dr. Fong Chee Wai, Head of R&D at Davos Life Science Pte Ltd as our guest speaker for the dinner meeting held at Maggiano's in Skokie. Dr. Fong flew all the way from Singapore to be with us. He had an outstanding presentation on the benefits of Natural Vitamin E in broad applications like personal care, nutritional products, as well as food and beverage.

Dr. Fong shared the history and discovery of Vitamin E. He disproved several myths of Vitamin E and gave us a great background on the research of the product. Dr. Fong opened our eyes to the benefits to natural Vitamin E vs. synthetic. He detailed several case studies on the product and showed what Davos can offer as the only company that can purify isomers of tocotrienol from palm oil for use in clinical trials and supplements.

All in attendance were educated in the evidence that tocotrienol is an effective anti-inflammatory agent. Dr. Fong showed how natural Vitamin E is a great option for consumers with so many diseases having a root cause of inflammation.

I look forward to seeing everyone at Suppliers Night in November. Please join us as we will be celebrating 50 years of Suppliers Night in Chicago!
